

Human Bone Histology and Behaviour in Holocene Asia-Pacific

Abstract

Bone remodelling processes are influenced by lifestyle, health, disease, and environmental factors.

Dr Miskiewicz's research investigates these processes and factors using microscopy of ancient and post-mortem bone.

In this talk she will present some of her DECRA (2019-2022) work focused on human bone histology in Holocene Asia-Pacific.

Dr Justyna Miskiewicz is an ARC DECRA Fellow at the Australian National University, where she moved to from Imperial College London in 2016. She holds a PhD (2014) from the University of Kent, UK.
